

Information Architecture Map & User Flows

Project Title

Redesigning a Public Service Platform for Enhanced UX & Accessibility

1. Information Architecture (Site Map)

Home Dashboard

- |
- | — Search Services
- |
- | — Citizen Services
 - | — Birth Certificate
 - | — Income Certificate
 - | — Utility Bill Payment
- | — License Services
- |
- | — Application Tracking
- |
- | — Notifications
- |
- | — Help Center
- |
- | — User Profile
- |
- | — Accessibility Settings
 - | — Increase Font Size
 - | — High Contrast Mode
- | — Language Selection

Justification

- Search Services helps users quickly find services.
 - Citizen Services groups related tasks together.
 - Application Tracking allows users to monitor progress.
 - Accessibility Settings improve usability for elderly and disabled users.
-

2. User Flow 1: Apply for a Service

Conclusion

This information architecture organizes services in a simple and logical manner. The proposed user flows reduce complexity, improve navigation, and make public services more accessible and user-friendly.
