

# User Research Report

## Project Title

Redesigning a Public Service Platform for Enhanced UX & Accessibility

## 1. Introduction

The purpose of this research is to identify usability problems faced by citizens while using public service websites and to redesign the platform to improve accessibility, navigation, and overall user experience.

---

## 2. Research Findings

### Identified Pain Points

1. Users find it difficult to navigate through multiple menus.
  2. Important services are hard to locate.
  3. Long forms are confusing and time-consuming.
  4. Elderly users face accessibility issues due to small text and poor contrast.
  5. Users struggle to track the status of submitted applications.
- 

## 3. User Personas

### Persona 1: Elderly Citizen

**Name:** Ravi Kumar

**Age:** 65

**Occupation:** Retired Teacher

#### Goals:

- Pay utility bills online
- Apply for government certificates

#### Challenges:

- Small text size
  - Complex navigation
  - Too many steps
-

**Persona 2: Working Professional**

**Name:** Priya Sharma

**Age:** 32

**Occupation:** Software Engineer

**Goals:**

- Quickly access public services
- Track submitted applications

**Challenges:**

- Limited time
  - Difficult-to-find services
- 

**4. User Journey Map**

**Task: Applying for a Birth Certificate**

| Stage     | User Action               | Pain Point             | Opportunity              |
|-----------|---------------------------|------------------------|--------------------------|
| Login     | User signs in             | Slow navigation        | Simplify dashboard       |
| Search    | User searches for service | Hard to locate service | Add search bar           |
| Fill Form | User enters details       | Long forms             | Break into steps         |
| Submit    | User submits application  | No confirmation        | Add confirmation message |
| Track     | User checks status        | Hard to find status    | Add tracking page        |

---

**5. Recommendations**

- Add a search bar on the homepage.
  - Group services into categories.
  - Improve accessibility (larger fonts and better contrast).
  - Add a progress indicator for forms.
  - Provide real-time application tracking.
-

## **6. Conclusion**

The redesigned public service platform will improve usability, reduce user frustration, and provide a more accessible experience for citizens of all age groups.
